Technical Skills

React **TypeScript** **JavaScript** **NestJS** **Bun** **Git**

Language & runtime: TypeScript, JavaScript, Bun.
Frontend: React, Tailwind CSS, Ant Design, shadcn/ui.
Backend: NestJS and ElysiaJS (foundational knowledge); REST API integration.
Data & infrastructure: PostgreSQL, Docker, Git, server deployment.
AI tooling: AI-assisted coding; familiarity with agent harnesses, tools, and Model Context Protocol (MCP).
Currently learning: Go and AI engineering.

Full-stack developer building web applications with React and TypeScript. Experience includes frontend-backend integration, data preparation for predictive modeling, and user interviews with healthcare professionals.

Experience

EpiQ | Full-Stack Developer 2025 - Present | epiq.top

- Develop frontend and backend features for a healthcare software product.
- Collect and analyze data to support the development of a predictive model.
- Visit hospitals and interview healthcare professionals to understand user workflows and product requirements.

NomadCodes | Frontend Developer Current

- Build web interfaces with React, TypeScript, and Ant Design.
- Integrate frontend features with backend APIs and connect UI components to application data.

Projects

LexiSpark | Creator & Full-Stack Developer lexispark.app

TypeScript, Bun, ElysiaJS, React, shadcn/ui

- Independently built and launched a language-learning application **with approximately 100 users.**
- Owned frontend and backend development, deployment, and server administration.

Online Judge | Independent Full-Stack Project GitHub repository

React, TypeScript, NestJS, Judge0, PostgreSQL, Docker

- Built a LeetCode-style platform for solving programming problems, submitting code, and evaluating solutions through Judge0.
- Implemented a NestJS backend and React frontend, with PostgreSQL storage and Docker Compose orchestration.

Education

Astana IT University 2025 - 2028

Bachelor's programme in Software Engineering | GPA: 3.1

Community & Achievements

WebSpace (2025 - Present) & Hustle / Business Club: Member; contribute startup ideas and support product development.
1st place, AITU / NNEF hackathon: 24-hour challenge focused on reservoir monitoring and flood prevention.
3rd place, Datathon 2026: Team awarded KZT 500,000; trained a YOLO26s model to detect violations in cash operations from video.
